

HEALTH AND SAFETY PROTOCOLS AT Pharmaceutical Crystallization Summit

As the Pharmaceutical Crystallization Summit draws near, we would like to highlight the importance of following COVID-19 prevention protocols at the 2-day event on October 14-15. The event venue, the Chauncey Hotel and Conference Center, will continue to practice safety guidelines to ensure the attendees' well being amid the COVID-19 pandemic **Chauncey's Health and Safety Plan**.

Here are some of the steps at the venue to ensure a safe and clean environment:

1

Social distancing settings are arranged in all public spaces

2

Hand-sanitizing stations are placed in all meeting rooms and event spaces as well as areas with high traffic

3

Floor plans within the event room are updated in line with physical distancing guidelines

4

All pieces of equipment and meeting amenities are sanitized before and after use

5

An attendant is designated to each break station to maintain cleanliness and sanitation

6

Signage is posted outside rooms and event spaces to remind participants of health and safety rules

7

All employees wear personal protective equipment (PPE) and are required to observe physical distancing and limited face-to-face contact

In addition, we will monitor any updates from the Center for Disease Control and Prevention and the New Jersey Department of Health, and take all the necessary steps to create a clean, sanitized, and safe environment for the participants. We also urge the attendees to do their part in avoiding the spread of the disease by protecting themselves and others. You may consider getting the COVID-19 vaccine to reduce the risk of contracting the virus to protect yourself and others.

We aim for a successful conference where industry leaders can collaborate and build strong ties while remaining safe and healthy.
